File No.3286/25/4/2020

The Commission took suo motu cognizance on a news item in Ganashakti dt.2nd October, 2020 captioned "৪ মাস ধরে জলবন্দি, চরম দুর্ভোগে ৫ গ্রামের মানুষ" A report was called from D.M., Burdwan which was duly enquired by S.D.O., Kalna, Purba Bardhaman.

According to the report the BDO, Purbasthali Block - I and SAE both enquired into the matter (their enquiry report is enclosed).

In their report it is mentioned that the area concerned is low lying land and lacking drainage system. This since some construction work was going on which led to accumulation of mud affecting local people. The SDO further commented that in the concerned area i.e. Jalahati and Kalitala due to expansion work of road, mud has accumulated in the area & affected local residents who are dependent on handloom industries.

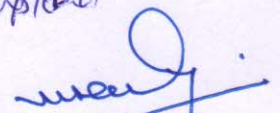

The S.D.O. has stated that water logging resulted from construction of culvert at Jaluidanga at STKK Road. The water logging problem has now been resolved since the construction is completed. Further, a drainage system has also been built for outflow of accumulated water, if any in future.

Since the administration has taken corrective measures I am of the view that matter be filed.

The Ad Registrar is directed to upload the order.
