

NOTE SHEET

4.

JK deceased was admitted to the home on 3rd Oct 2012. He died on 6th January 2016. JK medical report dated 3.10.2012 does not indicate that the vagrant was ill. As a matter of ^{of fact} the intervention which one gets is that the M.O. did not examine the vagrant. This is an instance of serious deviation of duty. The cause of death according to A.M. report is "severe anaemia with heart and lung disease" which could not have been developed overnight. This is a pointer to show ^{or suggest} that the vagrant was not provided medical assistance nor was he given adequate food during his stay at the home. If this is true, then the home is clearly to blame for violation of right to life.

What attempts were made to over rehabilitate the vagrant during the period of 3 years also needs to be examined. Age of the vagrant has been recorded as 40, 43 and 60. This is significant indeed. The D.W. of the Commission is directed to make an in-depth study and to furnish a report by 7th June 2017.
