

Dt. 12.06.2021

The mother was delivered of a stillborn child at 11.03 AM and soon thereafter the mother died. The husband of the victim allegedly did not consent to the post-mortem examination of the deceased woman. There is however no denial, in the report, of the allegation, in the news item, that the doctor was absent and the delivery was conducted by the nurse and the ayah most unscientifically.

The honorable member is requested to formulate an order according to his views.

(Justice Girish Chandra Gupta)

Chairperson

From the enquiry report no negligence angle of medical treatment is revealed. On the contrary all efforts have been made to provide medical care to patient who survived the trauma of delivery a still born child. In my view matter be filed
