

Date: 08.04.2015

This is a complaint from one Gopinath Bera and others of 2 No., Ramkrishna Pally, Baltikuri, Howrah-711 113. The complaint is against one iron factory named M/s Ma Sitala Metal Works. The running of generator and blower machine of the factory has been causing air and noise pollution and also extreme hit resulting in health hazards for the adjacent residents.

A report was asked for from the Member Secretary, W.B. Pollution Control Board, Paribesh Bhavan, Salt Lake, Kolkata. In response to our letter the Member Secretary sent us a report along with a Notice for Closure Order and disconnection of Electricity. But it is not clear to the Commission whether the factory was actually closed. A report was again called for from the Chief Engineer (Planning) Cell, West Bengal Pollution Control Board whether the closure has been actually implemented. Finally it was reported by him that the unit was found closed and locked from outside.

It was at the intervention of the Commission the residents of 2 no. Ramkrishna Pally, Baltikuri, Howrah got rid of the nuisance of pollution.

OSD & E.O. Spl. Secretary
